Subject: Fishes collected in Cienega Creek County Preserve

Ken,
I have a letter submitted to Dr. Peter Reinthal, Department of Ecology and Evolutionary Biology, dated December 30, 2002. *Gila intermedia* and *Agosia Chrysogaster* were collected on April 3, 2002.

I can make you a copy for your project, but it might be best to get info from the fish collections at UA. Dr. Reinthal would be most helpful and may have other records as well.

Cheers
