Conservation Lands System Categories

This metadata information is subject to our [disclaimer](#). Metadata information presented here is maintained manually. Therefore, date-sensitive fields such as feature count and date of last update may not be up-to-date. All metadata is subject to errors inherent in a manual process.

Descriptive name Conservation Lands System Categories

File name clsadopt

Spatial domain Pima County

Abstract clsadopt displays the Conservation Lands System Priority Biological Resource categories of the Sonoran Desert Conservation Plan, providing conservation guidelines as adopted in the environmental element of the Comprehensive Plan. See [more information](#).

Known errors/qualifications Clsadopt is based on a series of 55 species habitat models and Priority Conservation Areas developed by biologists. Original polygons were dissolved on DESC field. Cls_sci & cls_spp are used as overlays.

Feature type polygon

Feature count 2,068
