Hey Lagarto,

Our Bd database consists of opportunistic sampling of sites statewide. We do have one Bd positive site in the Ritas (Big Casa Blanca Canyon). We also have negatives, but this is likely due to poor sampling coverage and low detectibility. Let me know if you need more. I'll check to make sure all of our swabs have been analyzed and get back to you.

Mike

Subject: Bd in Ritas?

Mike--

Pardon me if someone asked about this already, but is it true Bd has been documented in the Santa Ritas? Especially if in the Greater Greaterville/Box Canyon/Empire Cienega area?
