Subject: Re: spotted owl?

Angela,

The information we received from the camera trap crew is that the owl was photographed on November 4, 2014, near Box canyon at these coordinates – [redacted as per USFWS request, location is north of box canyon, approximately 1 mile west of project area—i.e. footprint].

This is near a camera site and so we request that the coordinates be kept low-key to safeguard the crew's safety and protect the equipment.

Take care.

Hi Jason,

Any more info on this? I'm at SWCA through this week and starting at the Coronado next Monday the 12th.

Thanks!

Angela

Angela and Josh,

The buzz is that someone told an FWS biologist about having seen an MSO in the action area. I believe there's a photo, and we've requested the GPS coordinates. I'll forward whatever I learn.
