Hi Ken,

Good to hear from you. I have attached a copy of the report you request. Hopefully, it is not too large! I am unaware of cuckoo surveys in this area since this project, but you might check with our HDMS folks in our Habitat Branch for possible updates. I should be in today, particularly in the afternoon if you have other questions.

Cheers,
Troy

Subject: Lower Cienega Creek

Hi Troy:

In case my phone message today was incoherent, and as an alternative to calling me back, I'm looking for documented Yellow-billed Cuckoo records along lower Cienega Creek, specifically *downstream of the Davidson Canyon confluence*, but upstream would be useful as well. I'm preparing a Biological Assessment that includes lower Cienega as part of the action area.

Also, I would be very interested in getting a hold of a copy of Corman and McGill (2000); the 1998 and 1999 survey report.

Thanks Troy.
