

Travel Management Economic Contribution Application (TMECA) For IMPLAN 2007 Data and Beyond

[Open Command Center](#)

Version 7-30-2009

Coronado
National Forest

Counties In Study Area

Cochise County
Pima County
Santa Cruz County

This application uses the **NEW** HD_NVUM.mdb database which is installed when **NEW NRIS NVUM** application is installed. If you do not have the new NVUM application installed, you can download just the database from either of these 2 sources:

http://fsweb.ftcol.wo.fs.fed.us/imi/economic_center/Travel%20Management%20Economics.html

ftp://ftp.ftcol.wo.fs.fed.us/pub/staff/imi/implan/implan/TMECA/HD_NVUM.zip

Unzip the file after saving to your hard drive.

****** OR ******

If you want to install the entire NRIS HD-NVUM software package visit:

<http://fsweb.nris.fs.fed.us/products/NVUM/index.shtml/>

NRIS NVUM has the latest NVUM data and produces many interesting reports.

Tables from "Spending Profiles for National Forest Recreation Visitors by Activity"

Some analyst feel that it doesn't make sense to have Local Day use for Primitive Camping and Backpacking. Therefore, the 0.04 segment share for Local Day use has been added to Local Overnight. The options buttons below allow the user to specify their preference. Note that there are no expenditures reported for Local Day use in Table 1. below.

Exclude Segment Share for Local Day

Include Segment Share for Local Day

Table A-2 Average Party Size by Activity and trip type

Rule 1: For four activities, the NVUM economic sample did not include 100 non-local trips. The NL day trip spending averages for these activities were therefore based on the local day trip spending average for the activity. The overall non-local day trip spending average (\$52) is 57% higher than the local day trip average (\$33). This ratio is used to estimate the non-local day trip spending average for the four activities with fewer than

estimate the non-local day trip spending average for the four activities with fewer than 10 NL day trip cases. For these activities, the non-local day trip average is estimated as 1.57 times the local day trip average. For example, the cross country ski non-local day trip average was estimated as $\$34 * 1.57 = \53 .

Rule 3: Five activities¹⁰ did not include enough local overnight trip cases to reliably estimate spending averages. For these activities the local overnight trip average was estimated at 60% of the non-local overnight trip average based on the overall ratio of spending averages of local and non-local overnight trips across all activities¹¹.

Two local day trip cells do not follow the general pattern from low to high. The low spending average for OHV use is above the average for the activity and the high spending average for hiking/biking is below the average. These differences are not statistically significant.

IMPLAN Model Variables

Employment (jobs)	538,376
Employee Compensation (dollars)	22,028,536,000
Proprietary Income (dollars)	2,232,442,000
Labor Income (dollars)	24,260,978,000
Other Property Income (dollars)	9,410,965,000
Total Income (dollars)	33,671,943,000
SAM Disposable Income Proportion	0.7070

Note: Total Income = Labor Income + Other Property Income
 Labor Income = Employee Comp + Proprietary Income

Aggregated IMPLAN Employment and Income

2-Digit Aggregation Industries	Employment (jobs)	Labor Income (\$million)
Agriculture	2,936	66.147
Mining	2,359	288.559
Utilities	2,659	257.315
Construction	34,100	1,570.303
Manufacturing	25,256	2,077.080
Wholesale Trade	13,010	724.269
Transportation & Warehousing	61,385	1,789.261
Retail Trade	11,351	521.162
Information	10,172	495.332
Finance & Insurance	19,913	843.812
Real Estate & Rental & Leasing	19,450	559.552
Professional, Scientific, & Technical Services	36,942	2,342.952
Management of Companies and Enterprises	3,145	156.174
Admin, Waste Mngt & Rem Serv	35,705	996.201
Educational Services	6,186	165.681
Health Care & Social Assistance	61,628	2,728.019
Arts, Entertainment, and Recreation	9,554	179.494
Accommodation & Food Services	40,215	771.032
Other Services	31,053	720.362
Government	111,356	7,008.270

Rules

- must mark your selections with a small case x...a large case X will cause feature not to work
- can't have more than one x in a row that is a group together row
- can't have an x in Summarize column if there is not an x in the group together column
- can't have a name in the summarize row without at least one x in the summarize column and vise versa

Total		108.6	

This table shows a summary of activity participation, by activity emphasis. This data is found on the NVUM worksheet. See footnotes for further explanation.

¹ Survey respondents could select multiple activities so this column may total more than 100%.

² The number in this column is the percent of survey respondents who indicated participation in this activity.

³ Survey respondents were asked to select just one of their activities as their main reason for the forest visit. Some respondents selected more than one, so this column may total more than 100%.

⁴ The number in this column is the percent of survey respondents who indicated this activity was their main activity.

Table F. Number of Party-Trips by Activity

	Use (Party-Trips)				
	Non-local Day Use	Non-local Overnight	Local Day use	Local Overnight	Non-Primary
Non-motorized					
Hiking/Walking	33,843	65,663	310,933	24,229	19,742

A Party-Trip is equal to the number of visits divided by the average party size for that activity and segment (Local Day, Local Overnight,

Bicycling	442	857	4,056	316	258	etc.)	
Other Non-motorized	594	1,153	5,458	425	347

Response coefficients estimate the rate at which an economy changes to recreation visits on National Forests. Response coefficients are derived from IMPLAN base year economic data together with Agency-specific data such as individual National Forest production functions, National Forest recreation expenditure profiles, etc. The response coefficients are imported from IMPLAN and applied to estimated levels of activities such as Hiking, OHV, etc. The combination of TMECA and IMPLAN produces a measure of the local economic impact of forest recreation use in terms of employment and income levels or changes. The employment and labor income response coefficients from TMECA represent the response per 1000 party-trips of recreation use.

Table K. Employment and Labor Income Effects

		Employment Effects (full and part time jobs)	Labor Income (2008 dollars)	Same as Report Table C.
Total Non-Motorized Use	Local	127	3,722,700	
	NonLocal	257	7,338,319	
Total Motorized Use	Local	53	1,557,762	

	NonLocal	42	1,212,128
Total All Other Use	Local	171	5,346,784
	NonLocal	299	8,960,266
Total	Local	352	10,627,246
	NonLocal	599	17,510,713
Total for Area		951	28,137,959
Total Non-Primary		24	696,705
Grand Total		975	28,834,664

For all NVUM recreation activities reported

[Open Command Center](#)

The 20 industry sectors shown on this report represent what is called a 2-digit North American Industrial Classification System, NAICS. This table shows the total employment and labor income for whole impact study area, by industry, and compares that number with the employment and labor income response to recreation use on the National Forest. In other words, this table shows the contribution to the local economy, by industry, due to recreation use on the National Forest.

Table L. Current Role of Forest Service Recreation-Related Contributions to the Area Economy

Industry	Employment (jobs)		Labor Income (millions of dollars)	
	Area Totals	FS-Related	Area Totals	FS-Related
Agriculture	2,936	7	\$67	\$0.180
Mining	2,359	1	\$294	\$0.086
Utilities	2,659	1	\$262	\$0.130
Construction	34,100	4	\$1,598	\$0.194
Manufacturing	25,256	20	\$2,114	\$0.948
Wholesale Trade	13,010	48	\$737	\$2.726
Transportation & Warehousing	61,385	22	\$1,821	\$0.855
Retail Trade	11,351	67	\$530	\$1.914
Information	10,172	7	\$504	\$0.278
Finance & Insurance	19,913	8	\$859	\$0.401
Real Estate & Rental & Leasing	19,450	12	\$569	\$0.354
Prof, Scientific, & Tech Services	36,942	17	\$2,385	\$0.972
Mngt of Companies	3,145	4	\$159	\$0.204
Admin, Waste Mngt & Rem Serv	35,705	44	\$1,014	\$1.956
Educational Services	6,186	8	\$169	\$0.242
Health Care & Social Assistance	61,628	35	\$2,776	\$1.597
Arts, Entertainment, and Rec	9,554	196	\$183	\$4.004
Accommodation & Food Services	40,215	244	\$785	\$4.899
Other Services	31,053	30	\$733	\$0.849
Government	111,356	23	\$7,133	\$1.304
Total	538,376	799	\$24,691	\$24.092
FS as Percent of Total	---	0.15%	---	0.10%

Glossary

- Direct effects:** Jobs and income that flow from the activity. (e.g., the change in the number of jobs stemming from a change in a particular NVUM recreation activity on a National Forest).
- Indirect effects:** Changes in sales, jobs and income in sectors that supply goods and services to the primary activity. (e.g., sale of groceries to restaurants).
- Induced effects:** Changes in the volume of sales in the region stemming from changes in household spending of income earned in the primary activity and its suppliers. (e.g., purchases made locally by the grocery clerks and the restaurant workers, and their families).
- Secondary:** The total of Indirect and Induced effects.

Report Interpretations

- Report Table A. Employment and Labor Income Effects by Activity Type**
This report shows, for each NVUM recreation activity segment (Local Day, Local Overnight, etc.), the annual average impact on jobs and income in the impact study area. This report reflects the user-defined groups created on Report Group Options worksheet.
- Report Table B. Percent of Total Employment and Labor Income Effects by Activity Type**
This report shows the contribution to the Total Employment and Income impact as a percentage, for each NVUM recreation activity, and by LOCAL and NON-LOCAL use. This report reflects the user-defined groups created on Report Group Options worksheet.
- Report Table C. Percent of Total Area Employment and Total Area Labor Income Effects**
This report shows the contribution to the Total Employment and Income impact as a percentage, for each user-defined group, and by LOCAL and NON-LOCAL use.
- Report Table D. Estimated Employment and Labor Income Effects for All Current Recreation Use Reported by NVUM**
This report shows, for each user-defined activity group, by LOCAL and NON-LOCAL use, the annual average impact on jobs and income in the impact study area.
- Report Table E. Activity Participation on Coronado National Forest**
This table shows a summary of activity participation, by activity emphasis. This data is found on the NVUM worksheet. See footnotes for further explanation.
- Report Table F. Number of Party-Trips by Activity**
A Party-Trip is equal to the number of visits divided by the average party size for that activity and segment (Local Day, Local Overnight, etc.).
- Report Table G. Expenditures (\$ per visit) by Activity**
A visit is equivalent to one person visiting the Forest to participate in a particular activity. This number multiplied by the average party size would give the expenditure per party per trip.
- Report Table H. Employment and Labor Income Response Coefficients by Activity Type**

Response coefficients estimate the rate at which an economy changes in response to recreation visits on National Forests. Response coefficients are derived from IMPLAN base year economic data together with Agency-specific data sets such as individual National Forest production functions, National Forest recreation visitor expenditure profiles, etc. The response coefficients are imported from IMPLAN into TMECA and applied to estimated levels of activities such as Hiking, OHV Use, etc. The combination of TMECA and IMPLAN produces a measure of the local economic impact of forest recreation use in terms of employment and income levels or changes. The employment and labor income response coefficients in TMECA represent the response per 1000 party-trips of recreation use.

Report Table I. Employment and Labor Income Effects by Activity Type

Same as Report Table A.

Report Table J. Percent of Total Employment and Labor Income Effects by Activity Type

Same as Report Table B.

Report Table K. Employment and Labor Income Effects

Same as Report Table C.

Report Table L. Current Role of Forest Service-Related Contributions to the Area Economy

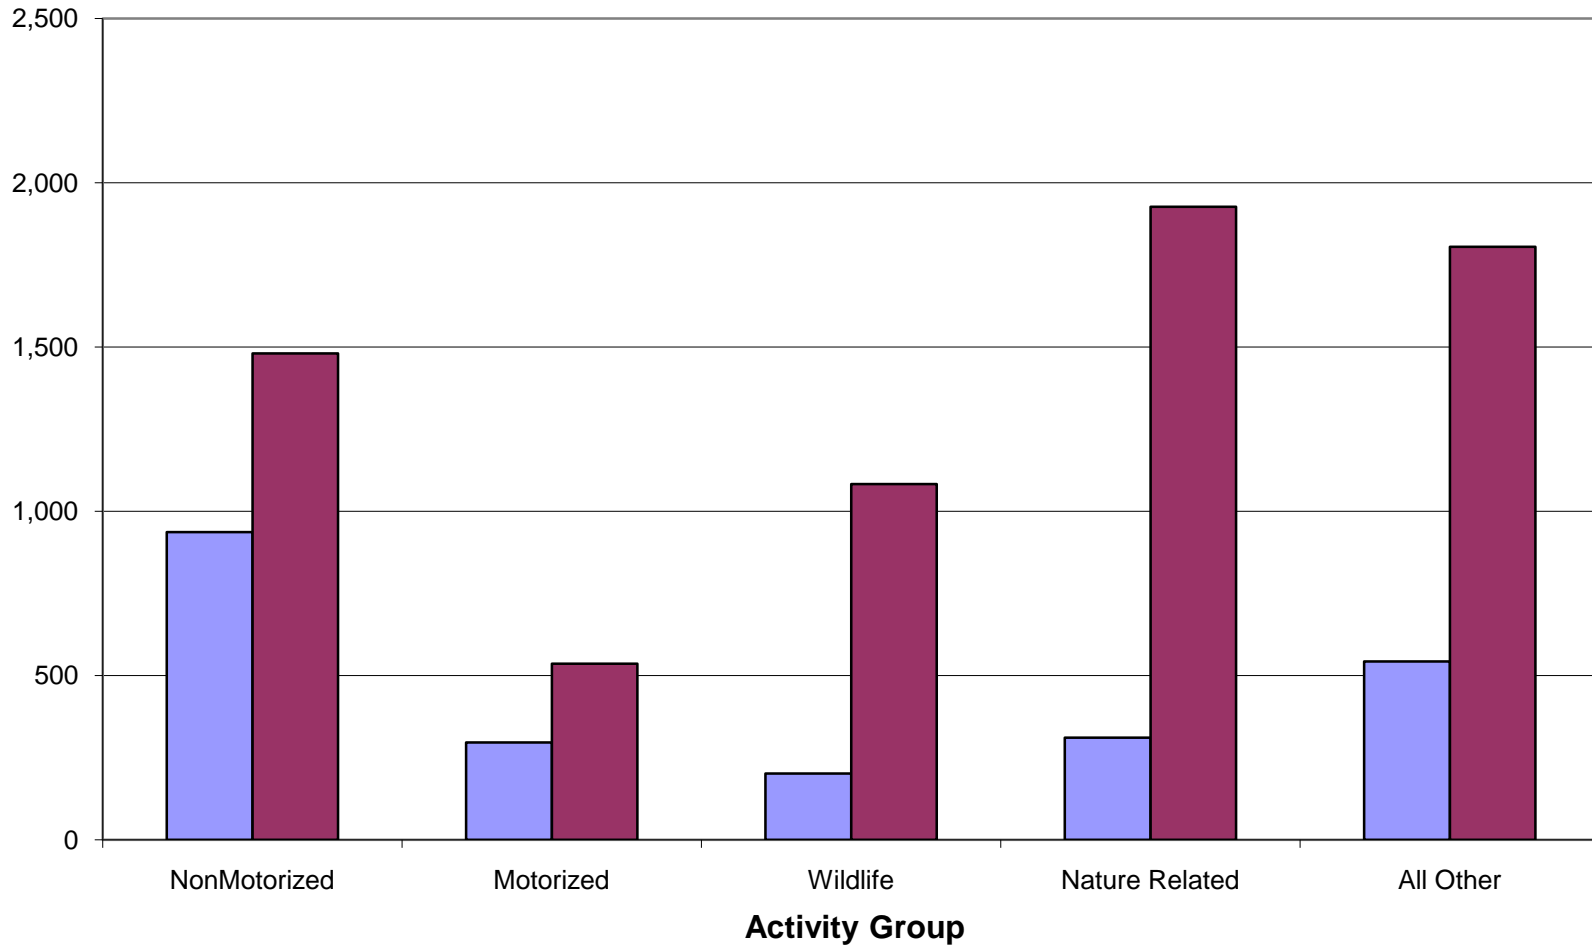

The 20 industry sectors shown on this report represent what is called a 2-digit North American Industrial Classification System, NAICS. This table shows the total employment and labor income for whole impact study area, by industry, and compares that number with the employment and labor income response to recreation use on the National Forest. In other words, this table shows the contribution to the local economy, by industry, due to recreation use on the National Forest.
